Subscription Rates

Annual institutional subscription rate (1993): £665.00 (U.S.$1264.00). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

Published monthly. Copyright © 1992 Pergamon Press Ltd

Second class postage paid at RAHWAY NJ. Postmaster send address corrections to Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

CONTENTS OF VOLUME 30

NUMBER 1

P. S. Whitton, G. S. Sarna, M. T. O'Connell and G. Curzon	The effect of the novel antidepressant tianeptine on the concentration of 5-hydroxytryptamine in rat hippocampal dialysates *in vivo*	1
N. Yonehara, T. Shibutani, Y. Imai, Y. Ooi, T. Sawada and R. Inoki	Serotonin inhibits release of substance P evoked by tooth pulp stimulation in trigeminal nucleus caudalis in rabbits	5
C. M. Fattaccini, H. Gozlan and M. Hamon	Differential effects of *d*-fenfluramine and *p*-chloroamphetamine on H75/12-induced depletion of 5-hydroxytryptamine and dopamine in the rat brain	15
R. Rivest, F. B. Jolicoeur and C. A. Marsden	Neurotensin causes a greater increase in the metabolism of dopamine in the accumbens than in the striatum *in vivo*	25
Y. Masuda, S. Murai, H. Saito, E. Abe, H. Fujiwara, I. Kohori and T. Itoh	The enhancement of the hypomotility induced by small doses of haloperidol in the phase of dopaminergic supersensitivity in mice	35
R. Redolat, P. F. Brain and V. M. Simón	Sulpiride has an antiaggressive effect in mice without markedly depressing motor activity	41
R. Rivest, S. St-Pierre and F. B. Jolicoeur	Structure–activity studies of neurotensin on muscular rigidity and tremors induced by 6-hydroxydopamine lesions in the posterolateral hypothalamus of the rat	47
S. Chesley, M. Lumpkin, A. Schatzki, W. R. Galpern, D. J. Greenblatt, R. I. Shader and L. G. Miller	Prenatal exposure to benzodiazepine—I. Prenatal exposure to lorazepam in mice alters open-field activity and $GABA_A$ receptor function	53
Janet L. Stringer and E. W. Lothman	Cholinergic and adrenergic agents modify the initiation and termination of epileptic discharges in the dentate gyrus	59
R. G. Pertwee and T. M. Ross	Drugs which stimulate or facilitate central cholinergic transmission interact synergistically with delta-9-tetrahydrocannabinol to produce marked catalepsy in mice	67
S. A. Turkanis, L. M. Partlow and R. Karler	Delta-9-tetrahydrocannabinol depresses inward sodium current in mouse neuroblastoma cells	73
G. K. Matheson, Dianne Guthrie, C. Bauer, A. Knowles, G. White and Carol Ruston	Sigma receptor ligands alter concentrations of corticosterone in plasma in the rat	79
Preliminary Notes		
N. S. Kula and R. J. Baldessarini	Lack of increase in dopamine transporter binding or function in rat brain tissue after treatment with blockers of neuronal uptake of dopamine	89
S. D. O'Connor, M. Hawkins and M. Radulovacki	The effect of soluflazine on adenosine receptors in the rat brain	93
R. J. Baldessarini, N. S. Kula, Y. Gao, A. Campbell and J. L. Neumeyer	R(−)2-Fluoro-N-*n*-propylnorapomorphine: a very potent and D_2-selective dopamine agonist	97
Emmeline Edwards, Kelly Harkins, G. Wright and F. A. Henn	$5\text{-}HT_{1b}$ receptors in an animal model of depression	101
P. Polc and I. Dučić	Benzodiazepine antagonist flumazenil reduces bicuculline-induced enhancement of neuronal activity in the spinal cord	107

NUMBER 2

K. Hashimoto and T. Goromaru	High affinity binding of [^{3}H]6-nitroquipazine to cortical membranes in the rat: inhibition by 5-hydroxytryptamine and 5-hydroxytryptamine uptake inhibitors	113
R. Invernizzi, C. Fracasso, S. Caccia, S. Garattini and R. Samanin	Effects of intracerebroventricular administration of *d*-fenfluramine and *d*-norfenfluramine, as a single injection or 2-hr infusion, on serotonin in brain: relationship to concentrations of drugs in brain	119
S. Robin Cohen, Alane S. Kimes and Edythe D. London	Morphine decreases cerebral glucose utilization in limbic and forebrain regions while pain has no effect	125
P. M. Thompson, G. Zebrowski and R. S. Neuman	Alteration of neocortical activity in response to noxious stimulation: participation of the dorsal raphe	135
A.-L. Sirén and G. Feuerstein	Hypothalamic opioid μ-receptors regulate discrete hemodynamic functions in the conscious rat	143
Maria V. Catania, Maria A. Sortino, L. Rampello, P. L. Canonico and F. Nicoletti	Adenosine deaminase increases release of excitatory amino acids through a mechanism independent of adenosine depletion	153
O. C. Snead III	The γ-hydroxybutyrate model of absence seizures: correlation of regional brain levels of γ-hydroxybutyric acid and γ-butyrolactone with spike wave discharges	161
A. De Sarro and G. B. De Sarro	Responsiveness of genetically epilepsy-prone rats to aminophylline-induced seizures and interactions with quinolones	169
R. Yanagihashi, K. Yamanouchi and T. Ishikawa	The effects of apomorphine on the hippocampal field potential in freely moving rats: pharmacological evidence of the involvement of D_2 receptors	177
Sandra E. File, A. Zharkovsky and K. Gulati	Effects of baclofen and nitrendipine on ethanol withdrawal responses in the rat	183
J. K. Rowlett, B. A. Mattingly and M. T. Bardo	Neurochemical and behavioral effects of acute and chronic treatment with apomorphine in rats	191
C. H. Brennan and J. M. Littleton	Chronic exposure to anxiolytic drugs, working by different mechanisms causes up-regulation of dihydropyridine binding sites on cultured bovine adrenal chromaffin cells	199
Announcement		I

NUMBER 3

Masaomi Iyo, Takashi Itoh, Toshiro Yamasaki, Hiroshi Fukuda, Osamu Inoue, Hitoshi Shinotoh, Kazutoshi Suzuki, Susumu Fukui and Yukio Tateno	Quantitative *in vivo* analysis of benzodiazepine binding sites in the human brain using positron emission tomography	207
S. J. Dolin, T. L. Patch, M. Rabbani, P. V. Taberner and H. J. Little	Differential interactions between benzodiazepines and the dihydropyridines, nitrendipine and Bay K 8644	217
P. D. Feldman and R. B. Felder	Effects of γ-aminobutyric acid and glycine on synaptic excitability of neurones in the solitary tract nucleus	225
R. G. Pertwee and A. P. Wickens	Enhancement by chlordiazepoxide of catalepsy induced in rats by intravenous or intrapallidal injections of enantiomeric cannabinoids	237
R. J. Marley, Catharine Heninger, Theresa D. Hernandez and Dorothy W. Gallager	Chronic administration of β-carboline-3-carboxylic acid methylamide by continuous intraventricular infusion increases GABAergic function	245
R. A. O'Donnell and A. A. Miller	The effect of lamotrigine upon development of cortical kindled seizures in the rat	253
A. Szmigielski and J. Zalewska-Kaszubska	Cooperation between D_1- and D_2-dopamine receptors in the nucleus accumbens	259

G. Koski, Katharine Lawrence and D. Righi	Ethanol-induced inhibition of carbachol-stimulated uptake of calcium in PC12 pheochromocytoma cells	267
R. R. Dawirs, G. Teuchert-Noodt and M. Busse	Single doses of methamphetamine cause changes in the density of dendritic spines in the prefrontal cortex of gerbils (*Meriones unguiculatus*)	275
R. C. Walovitch, M. Franceschi, M. Picard, E. H. Cheesman, K. M. Hall, J. Makuch, M. W. Watson, R. E. Zimmerman, A. D. Watson, M. V. Ganey, S. J. Williams and B. L. Holman	Metabolism of ^{99m}Tc-L,L-ethyl cysteinate dimer in healthy volunteers	283
A. Törőcsik and E. S. Vizi	Presynaptic effects of methoctramine on release of acetylcholine	293

NUMBER 4

M. G. Cutler	An ethological study of the effects of buspirone and the 5-HT_3 receptor antagonist, BRL 43694 (granisetron) on behaviour during social interactions in female and male mice	299
S. B. Auerbach, J. J. Rutter and P. J. Juliano	Substituted piperazine and indole compounds increase extracellular serotonin in rat diencephalon as determined by *in vivo* microdialysis	307
M. Gobbi, S. Cavanus, A. Miari and T. Mennini	Effect of acute and chronic administration of buspirone on serotonin and benzodiazepine receptor subtypes in the rat brain: an autoradiographic study	313
D. C. Martin, R. P. Introna and R. S. Aronstam	Fentanyl and sufentanil inhibit agonist binding to 5-HT_{1A} receptors in membranes from the rat brain	323
S. K. Kim, Y. Toyoshima, Y. Arai, H. Kinemuchi, T. Tadano, K. Oyama, N. Satoh and K. Kisara	Inhibition of monoamine oxidase by two substrate-analogues, with different preferences for 5-hydroxytryptamine neurons	329
N. H. Zawia, C. J. Mattia and S. C. Bondy	Differential effects of difluoromethylornithine on basal and induced activity of cerebral ornithine decarboxylase and mRNA	337
Annamaria Vezzani, R. Serafini, Maria A. Stasi, G. Viganò, M. Rizzi and R. Samanin	A peptidase-resistant cyclic octapeptide analogue of somatostatin (SMS 201-995) modulates seizures induced by quinolinic and kainic acids differently in the rat hippocampus	345
V. A. Duruibe, G. T. Blyden and A. Okonmah	Effect of cyclosporin A on the content of glutathione in the brain of the rat	353
D. Lévesque and S. A. Greenfield	Psychopharmacological evidence for a role of the ATP-sensitive potassium channel in the substantia nigra of the rat	359
A. N. Nicholson and Peta A. Pascoe	Presynaptic alpha$_2$-adrenoceptor function and sleep in man: studies with clonidine and idazoxan	367
J. T. Clark	Suppression of copulatory behavior in male rats following central administration of clonidine	373
G. Drolet, D. A. Morilak and J. Chalmers	Endogenous opioids tonically inhibit the depressor neurones in the caudal ventrolateral medulla of rabbits: mediation through δ- and κ-receptors	383
Angelika Scheucher, Azucena L. Alvarez, Nora Torres, Susana M. Dabsys, S. Finkielman, V. E. Nahmod and C. J. Pirola	Cholinergic hyperactivity in the lateral septal area of spontaneously hypertensive rats: depressor effect of hemicholinium-3 and pirenzepine	391
Preliminary Notes		
P. L. Wood and T. S. Rao	Morphine stimulation of mesolimbic and mesocortical but not nigrostriatal dopamine release in the rat as reflected by changes in 3-methoxytyramine levels	399

R. A. Barraco and J. W. Phillis — Subtypes of adenosine receptors in the brainstem mediate opposite blood pressure responses 403

M. Fortin, M. Degryse, F. Petit and P. F. Hunt — The dopamine D_2 agonists RU 24213 and RU 24926 are also kappa-opioid receptor antagonists 409

R. C. Drugan, P. V. Holmes and Anne P. Stringer — Sexual dimorphism of stress-induced changes in renal peripheral benzodiazepine receptors in rat 413

Announcement I

NUMBER 5

P. P. Godfrey and Z. Taghavi — The inhibition of agonist- or depolarisation-evoked formation of inositol phosphate by excitatory amino acids in rat cerebral cortex is due to the neurotoxic action of this class of neurotransmitter and is mediated by sodium influx 417

Y. Suzuki, T. Mimaki, H. Arai, S. Okada and K. Kuriyama — Effect of γ-vinyl γ-aminobutyric acid on the γ-aminobutyric acid receptor-coupled chloride ion channel in vesicles from the brain of the rat 423

O. Pierrefiche, K. Schmid, A. S. Foutz and M. Denavit-Saubié — Endogenous activation of NMDA and non-NMDA glutamate receptors on respiratory neurones in cat medulla 429

R. A. Gonzales, S. L. Westbrook and Letitia T. Bridges — Alcohol-induced inhibition of *N*-methyl-D-aspartate-evoked release of [^{3}H]norepinephrine from brain is related to lipophilicity 441

U. Bickel, T. Thomsen, J. P. Fischer, W. Weber and H. Kewitz — Galanthamine: pharmacokinetics, tissue distribution and cholinesterase inhibition in brain of mice 447

H. Xu, C.-H. Kim, Y. C. Zhu, R. J. Weber, A. E. Jacobson, K. C. Rice and R. B. Rothman — (+)-*cis*-3-Methylfentanyl and its analogs bind pseudoirreversibly to the mu opioid binding site: evidence for pseudoallosteric modulation 455

B. Fornstedt and A. Carlsson — Effects of inhibition of monoamine oxidase on the levels of 5-S-cysteinyl adducts of catechols in dopaminergic regions of the brain of the guinea pig 463

S. Dijk, H. J. Krugers and J. Korf — The effect of theophylline and immobilization stress on haloperidol-induced catalepsy and on metabolism in the striatum and hippocampus, studied with lactography 469

Y. Kataoka, K. Shibata, A. Miyazaki, Y. Inoue, K. Tominaga, S. Koizumi, S. Ueki and M. Niwa — Involvement of the dorsal hippocampus in mediation of the antianxiety action of tandospirone, a 5-hydroxytryptamine$_{1A}$ agonistic anxiolytic 475

A. Lund, N. Mjellem-Joly and K. Hole — Chronic administration of desipramine and zimelidine changes the behavioural response in the formalin test in rats 481

Ronnie Guillet and Carol Kellogg — Neonatal exposure to therapeutic caffeine alters the ontogeny of adenosine A1 receptors in brain of rats 489

S. Kanba, G. Yagi, T. Nakaki, R. Kato and E. Richelson — Potentiation by a sodium channel activator of effects of lithium ion on cyclic AMP, cyclic GMP and inositol phosphates 497

N. Yamada and D. K. Bilkey — Nifedipine has paradoxical effects on the development of kindling but not on kindled seizures in amygdala-kindled rats 501

P. H. Yu and B. A. Davis — 2-Propyl-1-aminopentane, its deamination by monoamine oxidase and semicarbazide-sensitive amine oxidase, conversion to valproic acid and behavioral effects 507

O. Kadlec, I. Šeferna and J. Ševčík — An attempt to localize the site of action of different agents within cholinergic motor neurones of the myenteric plexus-longitudinal muscle preparation of the guinea pig ileum by the triple bath method 517

Preliminary Notes

R. Neeper, E. Richelson and A. Nelson — Neuroleptic binding to muscarinic M_2 receptors of normal human heart *in vitro* and comparison with binding to M_1 and dopamine D_2 receptors of brain 527

S. A. McDougall and M. T. Bardo — Ontogenetic changes in dopaminergic pre and postsynaptic elements in rat brain: effects of quinpirole and sulpiride 531

Helen C. Jackson and D. J. Nutt — Inhibition of baclofen-induced hypothermia in mice by the novel $GABA_B$ antagonist CGP 35348 535

NUMBER 6

Laura C. Daniell — *N*-Methyl-D-aspartate increases cytoplasmic free calcium in mouse hippocampus 539

G. G. S. Collins — Pharmacological evidence that NMDA receptors contribute to mono- and di-synaptic potentials in slices of mouse olfactory cortex 547

T. S. Rao, P. C. Contreras, J. A. Cler, M. R. Emmett, S. J. Mick, S. Iyengar and P. L. Wood — Clozapine attenuates *N*-methyl-D-aspartate receptor complex-mediated responses *in vivo*: tentative evidence for a functional modulation by a noradrenergic mechanism 557

T. S. Rao, J. A. Cler, S. J. Mick, S. Iyengar and P. L. Wood — Polyamines modulate events mediated by the *N*-methyl-D-aspartate (NMDA) receptor complex through an ifenprodil-insensitive pathway: *in vivo* measurements of cyclic GMP in the cerebellum 567

R. Invernizzi, Laura Pozzi and R. Samanin — Release of dopamine is reduced by diazepam more in the nucleus accumbens then in the caudate nucleus of conscious rats 575

V. Barrios, M. N. Rodríguez-Sánchez and E. Arilla — Effect of maternal exposure to nicotine in the rat on level and binding of somatostatin in brain of developing offspring 579

H. Ono, A. Mishima, S. Ono, H. Fukuda and M. R. Vasko — Inhibitory effects of clonidine and tizanidine on release of substance P from slices of rat spinal cord and antagonism by α-adrenergic receptor antagonists 585

T. Maurice, G. Barbanel, J.-M. Kamenka and J. Vignon — Modulation by dopamine of [^{3}H]*N*-[1-(2-benzo(b)thiophenyl)cyclohexyl]-piperidine ([^{3}H]BTCP, a phencyclidine derivative) binding to the dopamine uptake complex 591

Véronique Baudrie and F. Chaouloff — Influence of catecholaminergic and serotonergic receptor antagonists on the hyperglycaemic response to the neuroglucopaenic agent, 2-deoxy-D-glucose 599

D. R. Nelson, G. D. Pratt, K. J. Palmer, A. M. Johnson and N. G. Bowery — Effect of paroxetine, a selective 5-hydroxytryptamine uptake inhibitor, on β-adrenoceptors in rat brain: autoradiographic and functional studies 607

M. Johnson, G. R. Hanson and J. W. Gibb — Norepinephrine does not contribute to methamphetamine-induced changes in hippocampal serotonergic system 617

Henriette Frances and Claire Monier — Tolerance to the behavioural effect of serotonergic ($5\text{-}HT_{1B}$) agonists in the isolation-induced social behavioural deficit test 623

Virginia D. Lehmann-Masten and M. A. Geyer — Spatial and temporal patterning distinguishes the locomotor activating effects of dizocilpine and phencyclidine in rats 629

M. L. Proietti, A. Scotti de Carolis, C. Frank, Y. C. Zeng and S. Sagratella — *In vitro* depressant effects of U-54494A, an anticonvulsant related to kappa opioids, in the hippocampus 637

G. A. Tejwani, A. K. Rattan, K. P. Gudehithlu and J. S. McDonald — Modulation of mu, kappa and delta opioid receptors in the rat brain by isoflurane and enflurane 643

H.-H. Frey and M. Voits — Effect of psychotropic agents on a model of absence epilepsy in rats 651

M. C. Wallenstein	Attenuation of epileptogenesis by nonsteroidal anti-inflammatory drugs in the rat	657
L. Karp, A. Weizman, M. Fliman, S. Tyano and M. Gavish	Peripheral benzodiazepine receptors on platelets in chronic and detoxified alcoholics	665
Preliminary Notes		
S. D. O'Connor, M. Stojanovic and M. Radulovacki	The effect of soluflazine on sleep in rats	671
H. L. Havard, P. R. Buckland, M. C. O'Donovan and P. McGuffin	The effects of antidepressant drugs on kainate receptor mRNA levels	675

NUMBER 7

R. Godbout, Y. Chaput, P. Blier and C. de Montigny	Tandospirone and its metabolite, 1-(2-pyrimidinyl)-piperazine—I. Effects of acute and long-term administration of tandospirone on serotonin neurotransmission	679
P. Blier, O. Curet, Y. Chaput and C. de Montigny	Tandospirone and its metabolite, 1-(2-pyrimidinyl)-piperazine—II. Effects of acute administration of 1-PP and long-term administration of tandospirone on noradrenergic neurotransmission	691
E. Chojnacka-Wójcik and E. Przegaliński	Evidence for the involvement of 5-HT_{1A} receptors in the anticonflict effect of ipsapirone in rats	703
E. Chojnacka-Wójcik, E. Tatarczyńska, K. Gołembiowska and E. Przegaliński	Involvement of 5-HT_{1A} receptors in the antidepressant-like activity of gepirone in the forced swimming test in rats	711
M. Volosin, L. M. Cancela C. Laino, M. Massei and V. A. Molina	Adrenocorticotropic hormone influences the development of adaptive changes in dopamine autoreceptors induced by chronic administration of desipramine	719
P. K. Eide and K. Hole	Different role of 5-HT_{1A} and 5-HT_2 receptors in spinal cord in the control of nociceptive responsiveness	727
G. Teuchert-Noodt and R. R. Dawirs	Age-related toxicity in prefrontal cortex and caudate-putamen complex of gerbils (*Meriones unguiculatus*) after a single dose of methamphetamine	733
R. E. Raulli and F. T. Crews	Differences in imidazoline and phenylethylamine alpha-adrenergic agonists: comparison of binding affinity and phosphoinositide response	745
H. Bachelard, R. Rivest and C. A. Marsden	Posterior hypothalamic receptors involved in the cardiovascular changes elicited by electrical stimulation of the rostral ventrolateral medulla	753
S. Laganière, Janice Corey, X.-C. Tang, E. Wülfert and I. Hanin	Acute and chronic studies with the anticholinesterase Huperzine A: effect on central nervous system cholinergic parameters	763
A. Moser, A. Liebetrau and H. Cramer	Adenosine receptor-coupled adenylate cyclase in the caudate nucleus of the rat brain	769
G.-Z. Zhou, A. G. Katki, S. Schwarz, P. J. Munson and D. Rodbard	Quantitative characterization of multiple binding sites for phencyclidine and *N*-allylnormetazocine in membranes from rat and guinea pig brain	775
P. C. Pearce, M. J. Halsey, C. J. Maclean, E. M. Ward, M.-T. Webster, N. P. Luff, J. Pearson, A. Charlett and B. S. Meldrum	The effects of the competitive NMDA receptor antagonist CPP on the high pressure neurological syndrome in a primate model	787
P.-W. Gean and F.-C. Chang	Bursting discharges in disinhibited amygdala slices: the role of excitatory amino acid receptors	797
G. Bagetta, M. T. Corasaniti, G. Nisticó and N. G. Bowery	High vulnerability of dentate granule cells to the neuropathological effects induced by intrahippocampal injection of tetanus toxin	803

Preliminary Notes

Y. Arai, K. Nakazato, H. Kinemuchi, T. Tadano, N. Satoh, K. Oyama and K. Kisara — Inhibition of rat brain monoamine oxidase activity by cerebral anti-ischemic agent, ifenprodil 809

T. Moriizumi, M. Takada and T. Hattori — Morphological changes of striatal dopaminergic presynaptic boutons following intrastriatal kainate injection 813

M. P. Johnson and D. E. Nichols — Combined administration of a non-neurotoxic 3,4-methylenedioxymethamphetamine analogue with amphetamine produces serotonin neurotoxicity in rats 819

NUMBER 8

M. P. Brazell, S. N. Mitchell and J. A. Gray — Effect of acute administration of nicotine on *in vivo* release of noradrenaline in the hippocampus of freely moving rats: a dose–response and antagonist study 823

M. Kimura, H. Nojima, M. Muroi and I. Kimura — Mechanism of the blocking action of β-eudesmol on the nicotinic acetylcholine receptor channel in mouse skeletal muscles 835

T. J. Heppner and J. F. Fiekers — The effects of irreversible acetylcholinesterase inhibitors on transmission through sympathetic ganglia of the bullfrog 843

N. McNaughton and C. F. Coop — Neurochemically dissimilar anxiolytic drugs have common effects on hippocampal rhythmic slow activity 855

R. Bousselmame, M. Eustache, A. Michael-Titus and J. Costentin — Chronic inhibition of enkephalinase induces changes in the antinociceptive and locomotor effects of the enkephalinase inhibitor acetorphan in rats 865

Jana Sawynok, Mary J. Espey and Allison Reid — 8-Phenyltheophylline reverses the antinociceptive action of morphine in the periaqueductal gray 871

A. A. Mustafa — Rapid desensitization of central beta-adrenoceptors in rat after subacute treatment with imipramine and calcium entry blockers 879

H. Tanii, M. Hayashi and K. Hashimoto — Behavioral syndrome induced by allylnitrile, crotononitrile or 2-pentenenitrile in rats 887

M. Iannone, M. R. Ciriolo, G. Rotilio and G. Nisticò — Intra-nigral infusion of Cu-free superoxide dismutase prevents paraquat-induced behavioural stimulation and ECoG epileptogenic discharges in rats 893

C. Ferrarese, A. Guidotti, E. Costa, R. S. Miletich, K. C. Rice, B. R. de Costa, M. J. Fulham and G. Di Chiro — *In vivo* study of NMDA-sensitive glutamate receptor by fluorothienylcycloexylpiperidine, a possible ligand for positron emission tomography 899

N. M. Barnes, B. Costall, P. Egli, Z. P. Horovitz, J. W. Ironside, R. J. Naylor and T. J. Williams — Characterisation of [^{3}H]ceranapril recognition sites in rat and human brain tissue 907

S. Iyengar, P. L. Wood, S. J. Mick, V. M. Dilworth, N. M. Gray, J. M. Farah, T. S. Rao and P. C. Contreras — (+) 3-[3-Hydroxyphenyl-*N*-(1-propyl) piperidine] selectively differentiates effects of sigma ligands on neurochemical pathways modulated by sigma receptors: evidence for subtypes, *in vivo* 915

Preliminary Note

A. R. Knight, C. Wyatt and D. N. Middlemiss — Spironolactone causes a rapid down regulation of sigma recognition sites in guinea pig brain and liver 923

Announcement I

NUMBER 9

J. F. Chen, Z. H. Qin, F. Szele, G. Bai and B. Weiss — Neuronal localization and modulation of the D_2 dopamine receptor mRNA in brain of normal mice and mice lesioned with 6-hydroxydopamine 927

Terrell A. Patterson and J. O. Schenk	Effects of acute and chronic systemic administration of some typical antipsychotic drugs on turnover of dopamine and potassium ion-induced release of dopamine in the striatum of the rat *in vivo*	943
W. Kropf and K. Kuschinsky	Electroencephalographic correlates of the sedative effects of dopamine agonists presumably acting on autoreceptors	953
Sally A. Berry and G. A. Gudelsky	Effect of D_2 dopamine agonists on tuberoinfundibular dopamine neurons	961
